and low  
cost

## Family Health Coordinators are your link to other programs and services.

Healthy Communities focuses on the “Life Cycle” of our clients, which is all the activities that must happen to obtain coverage and access to health care services in appropriate settings. Healthy Communities provides Family Health Coordinators to Serve CHP+ and Medicaid clients with case management and other resources.

### Family Health Coordinators:

- ✚ Offer information on how to apply for Medicaid and CHP+ and assist with applications.
- ✚ Inform where to submit applications.
- ✚ Educate on preventive healthcare services and how to access their benefits.
- ✚ Link providers to serve as a Medical Home for families. A “Medical Home” is a way to get children ongoing, coordinated, and comprehensive care. A team of healthcare providers will work within family priorities. A “Medical Home” allows families to get the medical and non-medical services needed.
- ✚ Provide information and referrals to other community programs and resources.
- ✚ Explain re-enrollment to prevent gaps in coverage.

### Medicaid COST

Children 18 and under on Medicaid will never have a copay for any covered service. Adults 19 and over may have to pay a small copay for doctor visits, pharmacy or hospital stays. Most pregnant women of any age will not have a co-pay while pregnant.

### CHP+ COST

For most families CHP+ is free. Depending on your monthly income, you may have to pay a small enrollment fee and small co-payments when you receive services and prescriptions

How can you get services?
